Country : Austria
Project ID : 00026416/0001 **Project Established**
ICS : 03.100.01

National Ref : ÖNORM ISO 19600
Title : Compliance management systems - Guidelines
Scope : This International Standard provides guidance for establishing, developing, implementing, evaluating, maintaining and improving an effective and responsive compliance management system within an organization. The guidelines on compliance management systems are applicable to all types of organizations. The extent of the application of these guidelines depends on the size, structure, nature and complexity of the organization. This International Standard is based on the principles of good governance, proportionality, transparency and sustainability.

Monthly Notifications Register

Notifications registered at CCMC from 2015-04-01 to 2015-04-30

Sector B : BUILDING AND CONSTRUCTION

Register issued on : 2015-05-04

Subsector B02: STRUCTURES

Subsector : B02 Registration Date : 2015-04-21
Organization : ASI
Country : Austria

Project ID : 00026419/0001 Project Established
ICS : 91.010.30, 91.080.10
National Ref : ÖNORM B 1993-1-1
Title : Eurocode 3: Design of steel structures - Part 1-1: General structural rules - National specifications concerning ÖNORM EN 1993-1-1, national comments and national supplements
Scope : This Austrian Standard specifies national parameters to ÖNORM EN 1993-1-1 and shall be applied jointly with ÖNORM EN 1993-1-1 in Austria. EN 1993-1-1 gives basic design rules for steel structures with material thicknesses t bigger 3 mm. It also gives supplementary provisions for the structural design of steel buildings. These supplementary provisions are indicated by the letter ζ B ζ after the paragraph number, thus $(\zeta)B$. The following subjects are dealt with in EN 1993-1-1: Section 1: General; Section 2: Basis of design; Section 3: Materials; Section 4: Durability; Section 5: Structural analysis; Section 6: Ultimate limit states; Section 7: Serviceability limit states. Sections 1 to 2 provide additional clauses to those given in EN 1990 ζ Basis of structural design ζ . Section 3 deals with material properties of products made of low alloy structural steels. Section 4 gives general rules for durability. Section 5 refers to the structural analysis of structures, in which the members can be modelled with sufficient accuracy as line elements for global analysis. Section 6 gives detailed rules for the design of cross sections and members. Section 7 gives rules for serviceability.

Country : Spain

Project ID : P0044586/0001 Project Established

ICS :

National Ref : PNE 88111:2011/1M

Title : Fibre cement profiled sheets. Guidelines for the use on roofing

Scope : In this amendment some modifications are introduced in the published version of UNE 88111:2011. This standard defines the basic characteristics of the materials used and establishes the criteria to be considered for the design of the covers in which corrugated sheets are used or veined fibre reinforced cement, including plates with insulation are built

according to the UNE 88113.

It also provides recommendations for transportation, handling and storage of materials.

Finally the conditions of use and maintenance of the covers are indicated in order to ensure the durability of them.

 Title : Standard practice for probability sampling of materials
 Scope : This practice covers simple methods for calculating how many units to include in a random sample in order to estimate with a specified precision, a measure of quality for all the units of a lot of material, or produced by a process. This practice will clearly indicate the sample size required to estimate the average value of some property or the fraction of nonconforming items produced by a production process during the time interval covered by the random sample. If the process is not in a state of statistical control, the result will not have predictive value for immediate (future) production. The practice treats the common situation where the sampling units can be considered to exhibit a single (overall) source of variability; it does not treat multi-level sources of variability.

Title : Assessment of the workers exposure to chemicals - Survey into predictive models to evaluate the occupational risk from chemicals
Scope : The purpose of the current Technical Report is to describe the general framework and the application field of the following predictive models: "Movarisch", "Application model proposed by Piemonte region to evaluate the chemical risk", "Stoffenmanager", "Cheope CLP", "Practical guidelines of a non-binding nature on the protection of the health and safety of workers from the risks related to chemical agents at work", that can be used for the assessment of the risk resulting from chemicals in the workplaces.

The Technical Report mentions any studies on the application of these models available in the scientific literature and it shows peculiarities and uses of each model.
